## RoHS Statement

Dear Customer

Thank you for your recent request for RoHS information.

Fluoroplastic is the generic name for PTFE, FEP and PFA, we only use virgin polymer to make our tubing, sleeving and heat shrink products.

We can confirm that none of the substances referenced in the EU directive 2011/65/EU (**RoHS II**) are intentionally added during the manufacture of our Fluoroplastic Products.

The substances referenced are:

Lead (Pb)

Mercury (Hg)

Cadmium (Cd)

Hexavalent Chromium (Cr 6+)

Polybrominated Biphenyls (PBB)

Polybrominated Diphenylethers (PBDE)

Please do not hesitate to contact us should you require any further information.

Yours sincerely

Samantha Deverell

Managing Director

Adtech Polymer Engineering Ltd
