**Statement regarding REACH and Substances of Very High Concern (SVHC)
updated 03/08/21 and published by ECHA**

Dear Customer,

The REACH Regulation EC 1907/2006 came into force in June 2007. The REACH Candidate list of Substances of Very High Concern (SVHC) was last updated 8th July 2021.

We are downstream users for all substances and articles we are using, according to REACH, and as downstream users we have to rely on our supplier for the registration of all raw materials.

We can inform you that we have received information from our material suppliers, that they have fulfilled their responsibilities regarding registration according to REACH regulation.

We can further confirm that we are not intentionally using or adding any of the substances REACH classify as Substances of Very High Concern (SVHC). By confirmation from our suppliers, we can also state that the raw materials they are using do not contain any of these substances in excess of 0.1% w/w.

We can also inform that our suppliers are not intentionally using or adding any substances listed in REACH XIV (as of 3rd August 2021). Neither are their raw material suppliers intentionally using, or the materials containing any of them, above regulated concentrations, if any of the substances would be used.

Adtech Polymer Engineering Ltd are continuously communicating with our supply chain to ensure that the products we are buying continue to follow the REACH regulations.

Please do not hesitate to contact us should you require any further information.
Yours sincerely,

Samantha Deverell

Managing Director
