

Smooth Bore PTFE Convoluted Tubing

PTFE flexible convoluted conduits are extensively used for electrical cables in the aerospace industry. They are used more and more in other industrial applications for similar use and also as light duty chemical transfer hoses.

We offer a standard range of smooth bore convoluted tube that is also available with an anti-static filler. Working temperatures range from -70°C to + 260°C. Ends can be supplied cuffed (straightened) or flanged for easy connection.

Standard Smooth Bore PTFE Convoluted Tubing Sizes

ID +/-0.75 (mm)	OD +/-0.75 (mm)	MBR (mm)	Weight (g/m)
6.80	8.60	38	41
7.90	10.00	38	56
10.00	12.50	51	70
13.60	16.40	76	70
16.70	20.20	102	161
19.80	24.30	127	204
26.00	30.30	150	268
