

PTFE flexible convoluted conduits are extensively used for electrical cables in the aerospace industry. They are used more and more in other industrial applications for similar use and also as light duty chemical transfer hoses.

Military vehicles industry, marine industry, chemical and nuclear industry, food processing and the electronics industry are a few examples.

We now offer a standard range of smooth bore convoluted tube. Working temperature range—70 Degrees C to + 260 Degrees C

Ends can be supplied cuffed (straightened) or flanged for easy connection.
