

FEP & PFA Roll Covers

FEP & PFA roll covers eliminate sticky build-up problems with rollers used in hot or cold applications.

FEP & PFA heat shrinkable roll covers can be applied to metal or rubber rollers using a simple hot air gun. Therefore, the machine down time can be just minutes compared with days when sending rollers away for a sprayed non-stick coating.

The thickness of our FEP and PFA roll covers is normally 0.5mm, compared with 0.005mm of a sprayed-on PTFE roller coating, and the cost is comparable or even less.

Alternatively, our experienced staff will fit our heat shrinkable FEP roll covers to rollers of any size in our workshop or at your premises.

Standard FEP Roll Cover Sizes

Adtech Part No	Supplied ID (mm inches)	Recovered ID (mm inches)
ARC16	21 0.83	16 0.63
ARC19	25 0.98	19 0.75
ARC23	27 1.18	23 0.90
ARC27	34 1.37	27 1.06
ARC32	41 1.69	32 1.26
ARC40	50 1.92	40 1.57
ARC46	60 2.32	46 1.81
ARC56	67 2.63	56 2.20
ARC65	81 3.26	65 2.55
ARC80	91 3.85	80 3.14

Adtech Part No	Supplied ID (mm inches)	Recovered ID (mm inches)
ARC100	116 4.52	95 3.74
ARC125	148 5.86	113 4.44
ARC150	174 6.96	130 5.12
ARC175	180 7.36	150 5.91
ARC200	203 8.38	177 6.97
ARC225	241 9.40	204 8.03
ARC250	266 10.39	242 9.53
ARC300	315 12.40	266 10.47
ARC350	350 13.77	315 12.40
